About the Team

FRC 1828, The BoxerBots

ESTABLISHED in the fall of 2005, the BoxerBots started as the Science Engineering, and Robotics Club at Vail High School in Vail, Arizona. Under the leadership of Don Adams, a science teacher at Vail High School, the team officially registered as a FIRST Robotics Competition (FRC) team for the 2006 build season. Since then the team has won numerous awards, including the Innovation in Control Spirit, and Entrepreneurship Awards.

Business & Web Design

FIRST stands for "For Inspiration and Recognition of Science and Technology". Founded by inventor Dean Kamen -- known for the Segway and Coca-Cola touchscreen soda fountain -- **FIRST** is a global robotics organization. The goal of **FIRST** is to build science and engineering leaders through a hands-on STEM education, whether it is with Lego pieces or fully functional competitive robots.

FIRST offers - A Suite of Hands-On, STEM Learning Programs: Through a progression of team-based robotics challenges and backed by a global network of mentors, coaches, volunteers, alumni, and sponsors, FIRST helps young people discover a passion for STEM and develop the skills they'll need to succeed in today's competitive workforce.
